

Infection Control Nurses Association

Corporate Membership

Background

The primary objective of the Association is the advancement of education in the art and science of infection control for the benefit of the whole community.

Within this objective, it is the intention to develop the relationship between the Association and commercial companies at a strategic level in the long term.

Over the last two years guidance on various aspects of infection control has been published in partnership with organizations such as the Royal College of General Practitioners, Royal College of Nursing and Community Practitioners & Health Visitors Association. Support from industry has been valuable in all the educational guidance documents. The guidance has been reviewed in over 12 different health journals and general sales of approximately 1,500 in the last few months alone
